IDENTIFIERS	*Hawaii; Student Objectives

ABSTRACT

Selected characteristics of evening students in Hawaii's seven community colleges are compared with those of students enrolled only in day classes and those of students enrolled in day and evening classes. Evening students composed 28% (N=6,004) of the total enrollment; 16% of the total enrollment (N=3,419) attended only evening classes, 12% (N=2,585) attended some day classes. The students in the three groups were similar in that the majority were male, most were continuing, most were seeking a degree or certificate, and almost all were Hawaii residents. However, the evening-only group contained a greater percentage of students not seeking a degree or certificate, fewer vocational majors, a larger proportion of part-time students (91%), older students (six to eight years older than the other groups), and more married students. Overall, the data indicate little change from previous semesters in terms of distribution of students by time of attendance and student characteristics. However, compared to Fall 1976, there were fewer evening classes (459 vs. 466), registrations (10,968 vs. 12,153), and student semester hours (30,458 vs. 34,644). Tabular data are appended, comparing the evening-only group to the other groups by the selected characteristics for each college and for the system as a whole. (DJD)

Previous reports on students attending evening credit classes have aroused considerable interest at the community colleges. Since these students comprise an integral part of the college clientele, they draw upon the colleges' resources in terms of facility utilization, faculty assignment, etc. Information about them has been useful for various planning purposes.

The emphasis of this report is on the Fall 1978 regular students who took only evening credit courses. [For the purpose of this report, evening courses are defined as those (1) starting after 5:00 p.m. or (2) starting before 5:00 p.m. but 50% or more of the instructional time is completed after 5:00 p.m.]

The evening-only students are compared with two other groups of students: (a) students who were enrolled in day-only courses (before 5:00 p.m.) and (b) students who were enrolled in a mixture of evening and day courses.

Sources: The primary source was student personal history/registration files at the end of the semester. (The enrollment figures are not the same as those reported in CC-IRP 114, Selected Characteristics of Students, Fall 1978, because that report is based on the beginning of semester figures.)

HIGHLIGHTS

1. In Fall 1978, a total of 6,004 students (28% of 21,045) attended evening classes at the community colleges. (Table 1)

   a. Of these, 3,419, 16%, were strictly "evening-only" students, i.e., attended evening classes only, while 2,585, 12%, attended both day and evening classes.

   b. An analysis by campus indicates quite a range in the number and percent of students attending evening classes, either as "evening-only" students or, as "day-evening" students: 20% at Hawaii and Honolulu to 40% at Windward and 46% at Kauai Community College.

JC 790 349

2. The three groups of students (evening students, only; day students, only; day-evening students) were similar in several ways (Tables II and III):

   a. The majority of students were males.

   b. Most were "continuing" (registered during the previous semester) students.

   c. Most of the students in the three groups were classified students, i.e., seeking a degree or a certificate.

   d. Well over 90% were U.S. citizens with Hawaii as a permanent home address and residency.

3. The evening-only group, however, differed from the day-only and evening-day groups:

   a. A greater percentage of students in the evening-only group were unclassified (22% compared to 6% and 5% for both the day-only and evening-day groups.) There were proportionately more liberal arts majors (48%, compared to 46%) but considerably fewer vocational majors (30%, compared to 48% and 49% for the other two groups.)

      Among vocational majors, enrollment was especially high in the management (158), accounting (141) and police science (91) programs. (See Appendix A for details by major program groupings.)

   b. Part-time students comprised 91% of the evening-only group while full-time students comprised 60% and 66%, respectively, of the day-only and day-evening groups.

   c. The evening-only students were carrying a lighter academic load compared to the others: 5.7 average SSH for the evening-only, 11.1 for the day-only and 12.1 for the evening-day groups. Their load was about 0.6 lighter than the Fall 1976 students.

   d. The evening-only students were at least 6 to 8 years older than their counterparts in the other groups as reflected in their mean ages: evening-only, 31.3 years old; day-only, 23.3 years old; and evening-day, 25.4 years old.

   e. Most evening-only students were married (54%). In contrast, most students in the other groups were unmarried: day-only, 82% and evening-day, 76%.

   f. Most evening-only students were pre-1974 Hawaii high school graduates (66%). In contrast, the day-only and evening-day students were 1978 Hawaii high school graduates, 78% and 69%, respectively.

4. Course Registration Data in Evening Classes (Table IV)

Course registration information for evening classes in Fall 1978 shows that there were 411 courses and 459 classes, of which about 59% were in the general education area. The 6,004 students enrolled in the evening classes generated 10,968 registrations and 30,458 student semester hours (SSHs). Noteworthy is that the SSHs generated for these evening classes comprised 14% of the total reported for fall (215,173). SSHs generated in the evening classes ranged from 9% to 23%, by campus.

The data in Table IV further show that compared to Fall 1976, there were fewer classes, fewer registrations and semester hours offered. Consequently, SSHs declined by slightly over 4,000, 12%.

SUMMARY

Data over the semesters indicate little change in terms of distribution of students by time of attendance and in terms of selected student characteristics.* About 28% of the students were registered in evening classes; of these, 16% were evening-only students. More of evening-only students were part-timers, unclassified students, married and older than the students in the other groups.

Although evening courses generated 14% of the total SSHs, they were utilized by 28% of all students (16% evening-only and 12% evening-day).

What are the implications for curriculum and facilities planning? What kinds of services would best meet the needs of these students? Is there a need for further expansion of evening credit offerings?

---

*See CC-IRP 102, Table VI, pp. 18 and 19 for details.
